

TEAM AGREEMENTS

- **Ensure Tasks Completed:** Every member must proactively track their own deadlines on Google Sheet. If you encounter a critical bug or risk falling behind schedule, notify the team at least 1 day before the deadline so we can support you—do not suffer in silence.
- **Clean & Functional Code:** Before marking a task as done or pushing code to Git, you must run and test it locally to ensure there are no logical errors and that it won't crash the team's application.
- **Daily Progress Sync:** At the end of each workday, simply update your task status on Notion (To Do → In Progress → Done) so everyone stays aligned on the project's current status.
- **Weekly Sync Meetings:** The team will meet once a week to review overall progress, keep track of all ongoing tasks, and adjust plans if necessary to ensure we stay on schedule.
- **Absence & Delay:** If you are busy or unable to attend a meeting/finish a task, you must notify the team at least 1 day in advance to negotiate. Only valid reasons with proper proof/evidence will be approved.
- **Efficient Meetings:** Keep group meetings short and to the point. Focus strictly on: *What is done? What bugs are you facing? What is your next task?* to save everyone's time.
