School of Science, Computing and Engineering Technologies

TEAM AGREEMENTS

Intelligent System (COS30018)

Project: Handwritten Recognition System

Date: May 23rd, 2026

1. PURPOSE AND PRINCIPAL

This document outlines the core values, communication rules, and engineering standards agreed upon by all team members. The goal is to ensure project quality, maintain a smooth workflow, and build a supportive, transparent environment where no one is left behind.

2. CORE COMMITMENTS

2.1 Accountability and Task Completion

- **Proactive Tracking:** Every member is strictly responsible for monitoring and updating their own deadlines on the shared Google Sheet.
- **No Suffering in Silence:** If you encounter a critical bug, blocker, or risk falling behind schedule, you must notify the team at least 1 day before the deadline so other members can step in to support. Keeping struggles to yourself is strictly discouraged.

2.1 Engineering Standards and Code Quality

- **Clean & Functional Code:** Clean, direct, and rigorous logic is our standard. Code must be treated like well-written prose that does exactly what the reader expects.
- **Local Testing:** Before marking a task as "Done" and pushing code to the remote GitHub Repository, members must run and test it locally.
- **Stability Assurance:** You must verify that your changes introduce no logical errors and explicitly announce your deployment to the team to ensure it does not break the stable build.

2.3 Progress Synchronization

- **Daily Async Sync:** At the end of each workday, update your task status on Notion (To Do -> In Progress -> Done) to keep everyone aligned on the project's real-time velocity.
- **Bi-Weekly Sync Meetings:** The team will meet once every two weeks to review overall progress, audit ongoing tasks, and adjust high-level plans to ensure milestones are met

2.4 Attendance, Absence & Delays

- **Advance Notice:** If you are unable to attend a meeting or finish a task on time due to unforeseen circumstances, you must notify the team at least 1 day in advance to renegotiate.
- **Accountability:** Only valid reasons accompanied by proper evidence/proof will be formally approved by the team.

3. ACKNOWLEDGEMENT & SIGNATURES

By signing below, each team member acknowledges that they have read, understood, and agreed to adhere to the terms of this Team Agreement. Non-compliance without a valid reason will be reviewed collectively by the team.
